THIS IS UNEVALUATED INFORMATION

[Redacted Box]

25X1 1. Cement, with an annual output of 251,000 tons, is the main product of the  
 25X1 Prvolovac factory, while oxygen is a by-product. The factory employs  
 575 workers, 100 clerks, and 19 students, and has the following  
 equipment:

- 3 rotation furnaces
- 4 Gruber furnaces
- 1 Gruber furnace, operating since the summer of this year
- 4 cement mills
- 2 Diesel electric units of 400 kilowatts each
- 2 Diesel electric units of 100 kilowatts each

2. The factory lacks spare parts, which, to a great extent, have to be imported from abroad. The Gruber furnaces and the mills are made up of old parts. The power machinery, sixty percent of which was destroyed during the war, was renewed only this year.

3. Electric energy is supplied to the factory by way of a long distance conduit from the Tito power station near Omis. The factory is also connected with the "10 October" and "Partisan" power stations.

25X1 4. Output of the factory is designed to meet the requirements of Yugoslav exports [Redacted] in turn for which Yugoslavia would receive raw materials, especially leather.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
